

ISPROG1 – If Statement Exercise
Grade Rating Program

Create a windows program that accepts four real number grades and computes the average of the four grades. The program must display the average grade and determine whether the grade falls under specific grade ratings and display the appropriate rating for the computed score. The grade ratings and score conditions are described below.

0.0	Grades below 70%
1.0	Grades from 70% to grades lower than 75%
1.5	Grades from 75% to grades lower than 80%
2.0	Grades from 80% to grades lower than 85%
2.5	Grades from 85% to grades lower than 89%
3.0	Grades from 89% to grades lower than 93%
3.5	Grades from 93% to grades lower than 97%
4.0	Grades from 97% and up

Note: Try doing this program in a console application as well.
